SURAJ MUDENUR

B.Tech Mathematics & Computing | Software • Data • AI/ML • Technology

Bengaluru, Karnataka, India | 9945904139 | surajmudenur2004@email.com | GitHub: github.com/Suraj2105-1

PROFESSIONAL SUMMARY

B.Tech Mathematics & Computing student with hands-on experience in software development, digital marketing, data analysis, artificial intelligence and full-stack application development. Skilled in Python, JavaScript/TypeScript, React, Node.js, SQL and AI/ML tools, with a focus on practical technology solutions, digital transformation and data-driven problem solving.

EDUCATION

M.S. Ramaiah University of Applied Sciences, Bengaluru | B.Tech – Mathematics & Computing | Expected Graduation: September 2027

Relevant Coursework: Data Structures & Algorithms, Probability & Statistics, Linear Algebra, Calculus, DBMS, OOP, Machine Learning, Artificial Intelligence

EXPERIENCE

CORENEST TECH LLP — MARKETING INTERN | *Remote | Aug 2026 – Present*

- Supported digital marketing initiatives focused on online visibility, audience engagement and brand awareness.
- Researched target audiences, industry trends and content topics to support marketing campaigns.
- Created and optimized digital/social content; monitored engagement metrics to identify trends and improvement opportunities.
- Collaborated on content planning, campaign execution and digital outreach using digital tools and AI-assisted workflows.

VALUTS OF CODE — WEB DEVELOPER | *Remote | Jun 2024 – Jul 2024*

- Developed responsive web pages and user-focused UI components using HTML, CSS and JavaScript.
- Worked with Git/GitHub for version control and collaborative development; debugged and tested frontend functionality.
- Applied modern web development practices to build clean, responsive and maintainable interfaces.

PROJECTS

ZYPHER — Cryptographic Discovery & Post-Quantum Migration Intelligence | *Python, FastAPI, React, Vite, Tailwind CSS*

- Developed an offline security analysis platform to discover cryptographic assets across source code, binaries, dependencies, containers and X.509 certificates.
- Built a cryptography inventory and CycloneDX CBOM; implemented quantum-risk assessment and migration planning aligned with NIST FIPS 203, 204 and 205.
- Developed React/Vite frontend and FastAPI backend for scanning, risk analysis, asset inventory and migration-plan visualization.

SOVEREIGNVAULT — Privacy-Preserving Decentralized Identity Verification | *React, Python, Solidity, zk-SNARKs, DID, Smart Contracts*

- Developed a privacy-preserving decentralized identity framework for validating credentials without exposing sensitive personal information.
- Implemented zk-SNARK-based proof generation/verification and integrated DID utilities, IPFS concepts and smart contracts for decentralized credential management.
- Implemented distributed key generation concepts and threshold cryptography for secure decentralized verification.

TECHNICAL SKILLS

Programming: Python, C++, Java, JavaScript, TypeScript, SQL

Web: HTML5, CSS3, React.js, Next.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets

AI/ML & Data: Machine Learning, NLP, Generative AI, LLMs, Prompt Engineering, Pandas, NumPy, Power BI, Excel

Databases & DevOps: MongoDB, PostgreSQL, MySQL, Git, GitHub, Docker, Vercel, Render

Testing & Core: API Testing, Software Testing, Debugging, Test Automation, DSA, OOP, Problem Solving

CERTIFICATIONS & OPEN SOURCE

- Web Developer — Valuts of Code, 2024 | Endpoint Certificate — 2026
- Open-source contributor with merged contributions to public software projects.

Languages: English, Kannada, Hindi
